Safronov Maxim

Software Development Engineer

Moscow Age: 20 years old

Work Experience (~0.5 year)

- **Yandex** May 2025 — August 2025

  Intern Backend-developer:

  - Developed and optimized internal services and a new API for video translation and TTS technologies.
  - Increased reliability by adding unit tests for new and legacy modules and implementing end-to-end tests for the new API.
  - Integrated logging, monitoring, and alerting systems, and contributed to CI/CD setup, testing, and deployment workflows.
  - Rewrote the transcoder to improve system performance and efficiency.
  - Built a Telegram bot using ProxyBot and a local API server with webhooks.

- **Tbank** May 2026 — Present

  Software Development Engineer:

  - Developed and maintained high-load Go backend services that rank personalized offers for each T-Bank customer, handling ~10k RPS (~4 Gb/s) in production.
  - Integrated CatBoost models into the production pipeline, keeping ML inference fast and reliable under peak load.
  - Designed data storage and caching across Redis, PostgreSQL, Cassandra, and ClickHouse to reduce response latency.
  - Increased service reliability with unit and integration tests, monitoring, and alerting, keeping services stable under very high load.

Education

- **National Research University Higher School of Economics, Bachelor's degree** 2028
  Faculty of Computer Science, Software Engineering
- **Central University, Bachelor's degree** 2028
  Faculty of Computer Science, Software Engineering
- **MAOU Gymnasium No. 40, General education (secondary education)** 2024
  Physics and Mathematics

Courses

- **Yandex** 2022
  Competitive Programming Study Group, Group B'

Competitive programming

- ICPC 2026 1/8 — 3rd Degree Diploma
- ICPC 2025 1/8 — 3rd Degree Diploma
- ICPC 2025 1/2 — 3rd Degree Diploma
- Yandex Cup 2024, Backend Track Finalist — 12th place
- Yandex Cup 2025, Backend Track Finalist — 7th place
- PROD Olympiad 2024 (Industrial Software Development) — Prize Winner
